A SPECIAL OFFERING OF  
**CATLEYA HYBRIDS**  
AND ALLIED GENERA

List #29

**FRED A. STEWART**

8606 East Las Tunas Dr.

San Gabriel, California

Telephone: ATLantic 7-8974 or ATLantic 7-0015

PRICE LIST  
of  
CATTLEYA HYBRIDS  
(and Allied Genera)

SPECIAL LISTING #29  
Spring 1955

In making such a list as this we can show only a fraction of our stock. Those who visit the nursery can choose from numerous varieties not listed as well as from those in the catalog. All plants sold are in vigorous health and are bred from the finest parents for vigor, color, size, texture, and season of bloom. We have exercised the greatest care in the selection and breeding of our plants and our purpose is always for the production of top quality stock.

We are fully conscious of the constant improvement made by leading hybridists in the important types of commercial orchids. Our efforts are to maintain the front rank position of our nursery for top quality plants and our crosses look well into the future, since we realize that the period ahead will demand standards higher than those of the present day. It will be noted that our orchids capture top honors wherever shown.

When the orchid fancier, either amateur or commercial grower, picks up an orchid catalog, too often his reaction is confusion, created by the formidable array of names and crosses. As he studies the lists his selections are generally governed by his knowledge of the various plants and parents with which he may be familiar. Often worthwhile plants and promising seedlings are passed by because the prospective buyer is not familiar with them, or the seller does not provide adequate or necessary information. Because there are so many orchid hybrids in existence today, even the best informed person can know only a fraction of these. With this in mind we have attempted to give basic information about the particular plants presented, or the parents used in the seedlings offered. We believe this will make the catalog more interesting and useful to the general reader, and too, that it will assist the purchaser in his selections.

The fancier will find a complete range of colors, varieties, and seasons of bloom. Many of the crosses are bred along proven lines so as to minimize the amount of speculation; with others, though we are sure there will be many unusual things, we can only generalize as to season and color range.

We are pleased to have those interested in orchids and their culture visit our nursery. Our staff will assist orchid enthusiasts in their problems. Correspondence is invited.

We have separate catalogs on Cymbidiums and Cypripediums. Our collection of these genera is one of the finest in the country and we offer many promising seedlings bred from exhibition type parents. We would be happy to mail you these catalogs on request.

No.	Parentage and Description	Pot Size	Price per Plant
S-2	<u>C. JEAN BARROW X C. SUZANNE HYE ALBA</u> This cross is a very worthwhile winter and spring white. C. Suzanne Hye alba has been used with success in the making of such fine hybrids as C. Bow Bells, C. Edithiae, and many others.	4"	\$10.00
S-4	<u>C. SAMAR (C. Mt. Royal X. C. Fabianid)</u> A large flat flower of fine shape, color, and substance is the result of this cross. The Mt. Royal used has consistently proven to impart fine shape to its hybrids. The growth on these seedlings is excellent. Season is summer.	4"	7.50
		4½"	10.00
		5"	15.00
S-12	<u>C. TRIMOS ALBA (C. Trianae alba, 'Broomhill' X C. Mossiae Wageneri)</u> There is always a strong demand for good whites for March and April. The flowers on the seedlings we have bloomed have had pure white sepals and petals of good substance while the lips have had the characteristic yellow markings of the Mossiae Wageneri parent. The growth is very compact.	4"	12.50
		4½"	15.00
		5"	20.00
		5½"	25.00
S-14	<u>LC. CUESTENA (C. Altadena X Lc. Cuesta, 'Legacy')</u> A free flowering, easily grown quality hybrid was the object in making this cross. Lc. Cuesta ranks among the finest hybrids bred to date and here again it has proven its ability to breed quality. Season is winter. Color, mostly dark purple.	3"	6.50
		3½"	10.00
		4"	15.00
		5"	20.00
S-15	<u>LC. ALEGRIA (C. Varuna X Lc. Gitche Manitou)</u> This is a cross that is coming most worthwhile. Both parents are large and dark. Season is variable though primarily fall to winter. Exhibition - large, dark.	3½"	8.00
		4"	10.00
		4½"	12.50
		5"	15.00
S-16	<u>LC. KILAUEA (Lc. Cuesta, 'Colossal' X C. Trianae, 'Imperator')</u> Many forms of this cross are bound to be outstanding winter and early spring bloomers. Cuesta, 'Colossal' is famous as a parent of large dark hybrids.	3"	6.50
		3½"	9.00

No.	Parentage and Description	Pot Size	Price per Plant
S-18	<u>C. PAMELA STEWART (C. Concinnity, 'Celeste'</u> <u>X C. White Cloud)</u> We have been more than pleased with the first seedlings flowered from this fine white cross. Even on small plants the flowers have been large, of good shape, substance, and general high quality. One reason why we especially value this cross is because it flowers quite heavily during the late summer and early fall months when the fall weddings create such a heavy demand for whites at a time when not too many are blooming. For years hybridists have been working for a good white to flower at this time and we feel that C. Pamela Stewart fills a definite need.	4"	\$12.50
		4½"	17.50
		5"	22.00
		5½"	25.00
		6"	30.00
S-27	<u>C. MOSSIAE WAGENERI</u> A pure white, free flowering Cattleya to flower 3½" for June. This is the fourth batch of seedlings raised from crossing two selected C. Mossiae Wageneris. C. Mossiae Wageneri to our mind is one of the most profitable cut flower Cattleyas. We do not have a large block of this cross to offer.	3½"	12.00
		4"	15.00
		4½"	17.50
		5"	22.00
S-30	<u>C. HELEN P. DANE X C. BARBARA BILLINGSLEY,</u> <u>FINE VARIETY</u> We have every reason to expect a very good white to flower throughout the winter and early spring months. We feel that by giving the parentage of the two parents used we can show why we are confident of this cross. C. Helen P. Dane is C. Barbara Dane X C. Edithiae. C. Barbara Billingsley is C. Trianae alba, 'Broomhill' X Bebe White.	3"	7.50
S-35	<u>LC. SPINDRIFT (C. Brussels alba X C. Ville de Liege alba)</u> Wonderfully free flowering white with purple lip for summer and early fall.	4"	12.50
		4½"	15.00
		5"	20.00
S-36	<u>LC. SPINDRIFT (C. Ville de Liege alba X C. Brussels alba)</u> This is the reverse of our cross No. S-35. Please refer to above for a description.	4"	12.50
		4½"	15.00
		5"	20.00

No.	Parentage and Description	Pot Size	Price per Plant
S-43	<u>C. CLEMENTINE GOLDFARB X C. ROBERT H.</u> <u>JEWELL, FCC.RHS</u> The mating here is a fine yellow with a crimson lip onto a white with some yellow in the lip. We are reluctant to predict what the results of this cross will be; however, we feel that quite a few of them will be cream through yellow with some even running to shades of lavender with warm overtones. The season should be late summer to early fall.	4" 4½" 5"	\$12.50 15.00 20.00
S-48	<u>C. HAROLD ALBA, PAUWELS TYPE X LC. WINEMA</u> C. Harold alba, Pauwels type, has a splendid record over the years for breeding fine hybrids. Lc. Winema is a cross from which quite a number of splendid white with solid purple lip plants have flowered. The season is early summer through fall, which is a time when good whites are in demand.	4" 4½" 5"	12.00 15.00 22.00
S-49	<u>C. VILLE DE LIEGE ALBA X C. AMABILIS ALBA</u> Both parents here are noted for their vigor, floriferousness, and fine flower quality. An especially desirable feature of this cross is its season which is summer when good white with purple lips are especially in demand.	4" 4½" 5"	12.00 15.00 17.50
S-51	<u>C. BELGICA (C. Remy Cholet, 'Brilliant' X C. Enid, very fine)</u> The C. Remy Cholet used has unusually brilliant coloring and can be depended on to show up in a great many of the seedlings. The C. Enid is the finest from a large block of this hybrid. The season will be throughout the winter.	2½" 3" 4"	4.00 7.50 10.00
S-52	<u>C. REMY CHOLET, ORIGINAL TYPE X LC. KIT CARSON</u> This cross is three quarters C. Remy Cholet. In our opinion C. Remy Cholet is responsible for some of the finest and most satisfactory winter blooming purple Cattleya hybrids. The growth is very strong. The flowers have good size, shape, and coloring. We have every confidence here and expect to see some fine things. Season is winter to spring.	4" 4½" 5"	7.50 12.50 15.00

No.	Parentage and Description	Pot Size	Price per Plant
S-53	<u>C. BOW BELLS (C. Edithiae, White Empress type X C. Suzanne Hye alba, 'Crispa')</u> This is a repeat on a fine white Cattleya. Both parents used here were of very good quality and we have confidence that this will be a worthwhile white. The season is throughout the spring months.	Large plants 4" 4½" 5"	\$10.00 12.50 15.00
S-60	<u>C. PORTIA (C. Bowringiana X C. labiata)</u> There has been such a steady demand for plants of C. Portia that we feel amply justified in remaking a superior strain of this old time favorite. The growth, as could be expected, is excellent. The Cattleya labiata used is a selected form from a famous home raised strain of the species. The Bowringiana is of equal quality. The plants are bifoliate and will have about 12 flowers to the spray. Season is fall. Controllable.	2½" 3" 4"	4.00 6.50 12.50
S-62	<u>SLC. FIREQUEEN X BLC. DANTE, 'SUPERBA'</u> Here is a Potinara which though highly speculative is bound to flower some remarkable high colored red Sophrolaeliocattleyas.	2" 2½"	4.00 6.00
S-67	<u>LC. THUNDERHEAD (C. Achine alba X Lc. Winema, 'Lillian Stewart')</u> Both parents of this cross have rich white sepals and petals with solid dark lips and are excellent growers. This cross flowers throughout the fall. There are sure to be some fine things here. Controllable.	3" 3½" 4"	6.50 8.50 12.50
S-70	<u>LC. FLYING CLOUD (C. Mrs. F. Knollys alba, 'Magna' X Lc. Winema, 'Lillian Stewart')</u> For years both parents of this cross have been outstanding and consistent performers in our collection of stud plants. The C. Mrs. Knollys has a habit of flowering twice a year throughout the winter months with flowers of excellent carriage and remarkably large size. Many exhibition forms are showing up here. The season is variable though winter predominates.	4" 4½" 5"	15.00 17.50 20.00

No.	Parentage and Description	Pot Size	Price per Plant
S-79	<u>C. YVONNE ADAIR (C. Clementine Goldfarb X C. Helen P. Dane)</u> A very strong growing white of fine flower quality for early winter describes this very worthwhile cross. The C. Clementine Goldfarb parent is noted for its exceptional vigor, free flowering qualities, and high flower quality. The C. Helen P. Dane is in every way comparable to the first parent.	3"	\$ 7.50
		4"	12.50
S-85	<u>C. PRESIDENT POINCARE (C. Dupreana, 'Westonbirt' X C. Peetersii)</u> Here again we have a cross that is apt to be quite a spectacular producer of large dark flowers for the cut flower market. Both parents are noted for their vigor, free flowering qualities, and other desirable features. The season is expected to run from late spring through summer.	2"	3.00
		3"	5.00
S-86	<u>LC. MARIAN ANDREWS (Lc. Gitche Manito, 'San Gabriel' X. C. Amabilis, fine variety)</u> For years we have considered the Lc. Gitche Manito parent as being close to perfection in a Cattleya hybrid. The C. Amabilis parent is noted for its high flower quality, remarkable vigor, and extreme free flowering qualities. There are sure to be many fine purple type show up in this cross. The season is fall-winter. Plants flowered so far have been of exhibition quality.	3"	7.50
		4"	15.00
S-100	<u>C. MINA, very large X C. BARBARA BILLINGSLEY</u> Mina is noted for its exceptional size, while C. Barbara Billingsley is famous as a fine winter white. We cannot be sure of season here but can fully expect good quality whites.	2 $\frac{1}{2}$ "	4.00
		3"	6.50
		4"	12.50
S-103	<u>C. TRIANAE ALBA, 'BROOMHILL' X C. JOYCE HANNINGTON, 'GOLD MEDAL'</u> C. Joyce Hannington is considered by many to be one of the finest white Cattleyas ever bred. Crossed with C. Trianae alba, 'Broomhill' we have every reason to expect an outstanding white. Due to the C. Joyce Hannington parent the season could be expected to run from late fall through winter.	3"	7.50
		3 $\frac{1}{2}$ "	10.00

No.	Parentage and Description	Pot Size	Price per Plant
S-105	<u>C. PETABILIS (C. Amabilis, fine variety X C. Peetersii, very fine)</u> Should be a controllable cross of outstandingly fine quality. Both parents are noted for their large flowers, free flowering qualities, and great vigor.	2½"	\$ 4.00
S-107	<u>C. ROYAL VESTMENT (C. Labi-Royal X C. Peetersii)</u> We have utmost confidence that from this cross will come many superb, large, shapely dark prize winning Cattleyas. Plants are very sturdy and due to the breeding should be very free flowering. The first plants we flowered of this cross definitely lived up to our expectations. Season mostly fall to early winter.	3" 3½" 4" 4½" 5"	8.00 10.00 15.00 17.50 22.00
S-119	<u>C. PEETERSII (C. Hardyana X C. labiata)</u> As an all around fine dark Cattleya for control this has not been surpassed. Plants are vigorous and bear long strong sprays of fine dark flowers. Normal season, early fall.	3" 4"	7.50 12.50
S-123	<u>LC. IBABILIS (C. Ibbie X C. Amabilis)</u> The object here is for a variety that is a strong grower, will have well colored, heavy textured flowers about 5" across on strong stems. The seedlings are exceptionally vigorous. Though fall bloom should predominate, the season will run over to early winter. Best described as an improved Portia.	2½" 3" 4"	4.00 6.50 10.00
S-129	<u>C. LABI-ROYAL X C. LABIATA, VERY DARK VAR.</u> The first one was flowered as this was written. Flowers were very shapely and had fine dark reddish coloring. Should be very good for exhibition or controlled growing.	3" 3½" 4"	6.50 8.50 12.50
S-130	<u>C. EVAMAY PATTERSON (C. Intertexta, 'Juliette' X C. Trianae alba, 'Broomhill')</u> This should prove to be a very desirable white for early spring through Easter. Wherever the Broomhill form of C. Trianae alba is used, seedlings of great vigor are assured. The shape, size, and texture of those that have flowered have been very good.	4"	15.00

No.	Parentage and Description	Pot Size	Price per Plant
S-133	<u>C. VILLE DE LIEGE, COLORED STRAIN</u> (C. Peetersii, very dark X C. Gigas, 'Meteor') Perhaps the finest C. Gigas known by the famous dark Peetersii. Vigorous, free flowering for early summer.	3" 4"	\$ 6.50 12.00
S-143	<u>LC. PETITE (C. Harrisoniana, 'Stewart's'</u> <u>X Lc. Priam)</u> A medium size round, heavy textured lilac colored flower with a white to yellow lip. Season is throughout the late spring and summer. Seedlings are very vigorous. A characteristic of this cross is its outstandingly free flowering qualities.	2" 2½" 3" 4"	3.50 4.00 7.50 (flowering size) 12.50
S-153	<u>C. AMABILIS (C. labiata, very fine dark</u> <u>X C. Gigas, 'Meteor')</u> Could well be the finest strain of this famous cross. C. Amabilis when well grown cannot be surpassed for spectacular qualities. Season - Summer. Perfectly controlled to Christmas, New Years, or Spring.	2" 3"	3.00 6.50
S-166	<u>C. SYROS ALBA (C. Enid alba X C. labiata alba)</u> Should give a fine summer and early fall alba.	1 3/4"	1.75
S-173	<u>C. FABIA (C. labiata, very dark X C. Dowiana-aurea)</u> We don't know how better parents could be used to remake this famous variety. This cross will appeal to both the connoisseur who wants very dark reddish purples or to the hybridist who wishes to use selected forms for breeding. The season will be late summer to fall. Controllable.	2" 3" 3½"	4.00 6.50 9.00
S-174	<u>C. AMABILIS ALBA (C. labiata, 'Roeblingiana'</u> <u>X C. Gigas, 'F. M. Beyrodt', FCC.RHS)</u> A remake on a famous white with purple lip cross. Seedlings are very vigorous. Season will be late summer and early fall. This hybrid can be controlled for Christmas whites.	2" 2½" 3"	3.00 4.00 6.50
S-183	<u>LC. TRAILS END (Lc. Joseph Hampton X C. labiata)</u> For sheer spectacular exhibition qualities it is difficult to surpass this cross. This batch of seedlings is a repeat on the original.	2" 2½"	3.50 4.50

No.	Parentage and Description	Pot Size	Price per Plant
S-185	<u>C. LABIATA X C. PEETERSII</u> From thousands of plants of the two hybrids used here we selected the best forms to make this cross. Seedlings are very vigorous; flowers will definitely be large and very dark in most cases. Season will be late summer to fall. Can be controlled for Christmas.	2"	\$ 3.00
		3"	6.50
		3½"	7.50
S-186	<u>C. REGINA (C. labiata, fine variety X C. Dupreana, very dark)</u> Repeat on a successful famous cross. Seedlings are very sturdy and give promise of flowering many large dark forms. Free flowering qualities will be an outstanding characteristic of this cross along with dark flowers. Season will be late summer and early fall. Controllable to Christmas.	2½"	4.00
		3"	5.00
S-191	<u>C. MOSSIAE, 'REINECKIANA' X LC. ALBULA</u> White of sparkling quality with purple lip for spring.	2"	3.50
		2½"	4.00
S-192	<u>C. LORRAINE SAWTELLE (C. Barbara Dane X C. Clementine Goldfarb)</u> Whenever C. Barbara Dane enters into a cross we have confidence as to the results. There will be many fine whites for the fall season in this cross. The growth, as could be expected, is very strong.	3½"	8.00
		4"	10.00
S-213	<u>C. ARDENTISSIMA (C. Peetersii, fine large dark variety X C. Fabia, 'Firefall')</u> Many of the finest dark hybrids in existence today are bred from C. Ardentissima. We really do not know how it could be possible to use finer parents than those we have used in this cross. Seedlings are remarkably vigorous. Can be controlled for Christmas. This is one of our most promising really dark reddish purple crosses.	2"	3.00
		2½"	4.00
		3"	7.50
S-224	<u>LC. ALBULA X C. ENID ALBA</u> Should give a white with solid purple lip of exceptional quality for winter and spring.	1 3/4"	2.00

No.	Parentage and Description	Pot Size	Price per Plant
S-241	<u>C. DOROTHY MACKAILL X C. LODDIGESII,</u> <u>STANLEY'S', FCC.RHS</u> Here we have what so many people have been waiting for - another miniature like Henrietta Japhet, Celia, Vesper, Angelus, and others. Medium size waxy textured flowers - up to six on a spray. May well flower twice a year. Special "plant band" package offer - Plants grown 5 to a 2" square Cypress box, 15 months old. Plants sold 5 to a band only ----- For those who prefer the very largest we offer plants well established in -----		\$ 5.00 for group. 1 3/4" 2.00
S-246	<u>LC. TOKYO ROSE, 'ENCHANTRESS' X C. PEETERSII,</u> <u>VERY DARK</u> Large dark purple - Fall	1 3/4"	2.00
20-1	<u>C. ACOLITA (C. Trimos X C. Tityus)</u> We have bloomed a number of these and the average has been very high. Flowers are of good size and substance and have crimson lips with a very generous amount of yellow in the throat. The season is January on.	4" 4 1/2" 5"	10.00 12.50 15.00
20-2	<u>C. CHICKAMAUGA (C. Ardmore X C. Thetis)</u> We consider this to be one of the most satisfactory purples for February and March. The growth is exceptionally strong while the flower production is also outstanding. We have counted as many as 15 and 16 buds developing on a single 5 1/2" pot. The flowers characteristically have good shape, substance, and color. 5 1/2" The lips vary from heavily spotted crimson to almost solid color.	4" 4 1/2" 5" 6"	10.00 12.50 17.50 22.00 25.00
20-4	<u>C. BANDIT (C. Tityus X C. Nebo)</u> Good quality flowers and amazingly free flowering at a fine time of the year. The season is early winter. The flowers are warm rose lavender and the lips, as could be expected, are dark purple with rich yellow markings.	5" 5 1/2" 6"	15.00 17.50 20.00

No.	Parentage and Description	Pot Size	Price per Plant
20-7	<u>LC. CANHAMIANA ALBA (L. Purpurata, 'Orchid Knoll' X C. Mossiae Reineckiana, 'Young's')</u> Considered to be the best strain of Lc. Canhamiana alba made to date. We never cease to marvel over the vigor shown by plants of this cross. This is a repeat with the identical parents which were used to make the original strain. The season is May and June. White with solid purple lip.	5"	\$17.50
		5½"	20.00
		6"	22.00
		7"	25.00
20-11	<u>C. CORFLAMBO (C. Ardentissima, 'Colossal' X C. Jicarillo)</u> Large dark; very vigorous. Fine for cut flowers or exhibition.	4"	15.00
		4½"	17.50
		5"	25.00
		5½"	30.00
		6"	35.00
20-13	<u>LC. MYRON MCCORMICK (Lc. Dinelsior X C. Mossiae)</u> Dinah has a fine reputation as a parent. Lc. Dinelsior being a spring bloomer with a rich lip makes this a very desirable hybrid. The growth is very good. The plants show the C. Dinah influence in their growth habit. Have flowered some real prize winners.	4"	10.00
		4½"	12.50
		5"	17.50
20-14	<u>C. EDITHIAE (C. Trianae alba X C. Suzanne Hye alba)</u> The Edithiae we offer here is the famous Armstrong and Brown strain of Edithiae. Selected forms from this cross have been used to make many fine hybrids which are famous in their own right. The season for this cross is midwinter. To those who desire a strong growing, free flowering winter white of good quality we recommend this cross.	4"	7.50
		4½"	10.00
		5"	12.50
		5½"	15.00
		6"	17.50
20-15	<u>C. ELEANORE (C. Hardyana X C. Gigas)</u> One of the strongest growing, most free flowering and altogether most satisfactory crosses we have for May, June, and July. The flowers are large, of good dark color, and have very dark lips. If you want real show for early summer you should have this cross.	4"	10.00
		4½"	12.50
		5"	17.50
		6"	20.00

No.	Parentage and Description	Pot Size	Price per Plant
20-17	<p><u>C. ENID ALBA (C. Mossiae, Reineckiana, 'Young's' X C. Gigas, 'F.M.Beyrodt')</u></p> <p>This cross, due to the fact that it has so many desirable qualities, has been remade again and again. It is an extremely vigorous and compact grower. Its flower production leaves nothing to ask for. The flowers are large and of good shape and substance. The sepals and petals are pure white while the lips are heavily splashed crimson. In regard to its season of bloom, we feel we can do no better than quote a well known grower who when asked when C. Enid alba bloomed said, "Anytime throughout the winter when I want a good alba I go into the house and cut an Enid alba".</p>	4"	\$10.00
		4½"	15.00
		5"	17.50
		5½"	22.00
		6"	30.00 up
		7"	40.00 up
20-18	<p><u>C. ESTELLE ALBA (C. Cowaniae, 'Enchantress' X C. Edithiae)</u></p> <p>This fine white is very well known by now. The growth is very compact and the production leaves little to be desired. We offer flowering size divisions from our stock of selected forms of this hybrid. The season is quite extended though its peak production is early May, around Mothers' Day.</p>	4"	7.50
		4½"	10.00
		5"	12.50
		5½"	15.00
		6"	20.00
20-19	<p><u>LC. ETHEL MERMAN (Lc. Jane Dane X Lc. Canhamiana alba)</u></p> <p>Plants of this cross which have flowered in small pots have been very promising. White sepals and petals with solid purple lips. A spring bloomer of vigor. Some plants may flower through summer and fall.</p>	4"	10.00
		4½"	12.00
		5"	15.00
		5½"	20.00
20-22	<p><u>LC. INDRA (Lc. Integrity X C. Prospector)</u></p> <p>Another Lc. Integrity hybrid of merit. The growth is exceptionally strong. The flowers characteristically have good shape and substance and especially high lip color. This cross is currently proving up and we suggest that those who buy proven stock consider this cross.</p>	5"	20.00
		6"	30.00
		7"	35.00

No.	Parentage and Description	Pot Size	Price per Plant
20-24	<u>C. LUXURY (C. Estelle alba X C. Minnehaha)</u> Here is another white cross which is very promising. Both parents were carefully selected for vigor as well as flower quality. The growth is compact, vigorous, and free-branching which seems to point toward abundant flowering. Season is primarily spring.	4" 4½" 5" 5½" 6"	\$ 7.50 10.00 12.50 15.00 17.50
20-27	<u>C. MARION PATTERSON (C. Marion Davies X C. Trianae alba, 'Broomhill')</u> We can't bring to mind any cross made with C. Trianae alba, 'Broomhill' that doesn't have amazing vigor as well as fine quality. These seedlings are no exceptions. The flowers are pure white with some yellow in the lip. The season is winter and early spring. We think enough of this cross to raise quite a large block of it.	4" 4½" 5" 5½" 6"	10.00 12.50 15.00 17.50 20.00
20-32	<u>BLC. LYDA TAYLOR (Blc. Montecito X C. Nebo)</u> This is turning out to be a remarkably pleasing winter bloomer. The sepals and petals are of medium purple while the well shaped lips are intensely clear dark purple with sharply defined yellow in the throat. The two outstanding characteristics are the remarkable substance of the sepals and petals and the clarity of the coloring in the lips.	5"	20.00
20-33	<u>C. EDDIE RICKENBACKER (C. Mossiae X C. Thetis)</u> This is a companion cross to our No. 20-2. The qualities here, too, are outstanding. Again we say to those who want a good purple for February and March that this has proven very satisfactory.	4" 5" 5½"	12.50 20.00 22.00
20-35	<u>C. OCEANID (C. Nebo X C. Trimos)</u> An abundance of blooms for early spring. The growth is strong and compact while the flowers can be classed as an improvement over the well known cross, C. Nebo.	5" 5½" 6"	10.00 15.00 20.00

No.	Parentage and Description	Pot Size	Price per Plant
20-37	<u>C. PROSPECTOR (C. Santa Monica X C. Remy Cholet)</u> This is by now a famous cross throughout this part of the country, and it is proving to be a worthwhile parent. The production is very heavy, the quality of flowers is fine, and the season is excellent, being throughout the early winter months. The sepals and petals are warm rose lavender while the lips are dark purple. A great many of the forms have generous amounts of yellow in the lips.	4" 4½" 5" 6"	\$10.00 12.50 15.00 17.50
20-45	<u>C. CELE MARKELL (C. Souvenir de Louis Sander X C. Gravesiana)</u> We have always especially fancied a cross when C. Souvenir de Louis Sander is used. The seedlings that have flowered here have proven that our optimism was not unfounded. The growth is very strong. The flowers of most forms are very large white and of good shape and substance. Another desirable characteristic of this cross is its habit of flowering quite regularly through May. The C. Gravesiana parent has also aided considerably in assuring the quality of this cross.	4" 4½" 5" 5½" 6"	15.00 17.50 22.00 27.00 30.00
20-46	<u>C. TAHMURATH (C. Dinah, AM.RHS X C. Mossiae)</u> As was expected, and hoped for, the Dinah parent has come out quite strong in a number of the plants we have. The flowers have warm rose lavender sepals and petals with dark purple lips. The season for us has been primarily early winter, a number having been in for Christmas and New Years.	5" 6" 7"	20.00 25.00 30.00
20-47	<u>C. TETHYS (C. Annie J. Lines X C. Ardentissima, 'Colossal')</u> This cross has averaged very dark in color and of all around excellent quality. We have a good stock of plants from which we have taken divisions. Divisions from flowered plants are available to those who are desirous of obtaining this cross. The price is determined by the quality of flower and size of plant. All plants offered are off flowered large dark varieties.	4" 4½" 5" 5½"	20.00 22.00 27.50 35.00

No.	Parentage and Description	Pot Size	Price per Plant
20-49	<u>C. TRENTINO X C. MOSSIAE WAGENERI</u> Can be expected to be much like C. Mem. Alice Baldwin but with a later flowering period. A very fine form of C. Mossiae Wageneri was used.	5"	\$20.00
		5½"	25.00
20-52	<u>C. VILLE DE LIEGE ALBA (C. Gigas, 'F. M. Beyrodt' X C. Peetersii alba)</u> This cross has numerous remarkable qualities. It is a very strong grower and a remarkably free bloomer. The very large white with purple lip flowers are borne throughout June, July, and August each year. From either a commercial standpoint or just show qualities this cross is commendable.	5"	17.50
		5½"	20.00
		6"	30.00
		7"	40.00
20-54	<u>C. WEDDING DAY (C. Ben Nevis X C. Mina)</u> A very striking white of large size and good carriage. As could be expected from the breeding, the flowers do not have the full shape of many other whites, but due to the first mentioned qualities we have found this to be a worthwhile cross. The season has proven to be quite variable though a number of forms flower in early fall. For those who desire a very large flower of good carriage we suggest this cross.	4½"	12.50
		5"	15.00
		5½"	20.00
28-1	<u>LC. A. B. ANDERSON (C. Peetersii X C. Princess Margaret)</u> A very successful cross from two famous parents which has proven to be outstanding for vigor, free flowering qualities, and large, dark, heavy textured flowers. The season is spring through early summer primarily. Some varieties flower twice a year.	4½"	17.50
		5"	20.00
		5½"	25.00
		6"	30.00
28-2	<u>C. ARDMORE ALBA (C. Mossiae, Reineckiana, 'Young's' X C. Enid alba)</u> This fine hybrid has an abundance of the four basic qualities for a successful cross. The plants are vigorous and produce an abundance of large, heavy textured white with purple lip flowers in May. The season may vary somewhat in other parts of the country, though they flower at this time in Southern California. We consider this to be a first line cross by any standards.	4"	15.00
		4½"	17.50

28-4	<u>C. ESTHER KENNEDY (C. Estelle alba X C. Mem. Mrs. Robert Stone)</u> Much sought after but almost impossible to obtain are white Cattleyas with little if any yellow coloring in the throat. We especially recommend this cross to those who desire this type of flower. The growth is good; the plants are free flowering; and the season is winter through early spring.	4" 4½" 5"	\$15.00 17.50 22.00
28-5	<u>C. HENRIETTA JAPHET (C. Loddigesii, 'Stanley's' FCC.RHS X C. Eucharis)</u> Flowers of this type of medium size and heavy waxy substance are becoming increasingly popular throughout the country. Other whites of this type are C. Snowsong, C. Celia, C. Vesper, and C. Angelus. Plants are very vigorous. The flowering season runs approximately August through December.	4" 4½" 5" 5½"	12.50 15.00 20.00 30.00
28-6	<u>C. ILLUMINATION (C. Trianae X C. Balinda)</u> A winter flowering purple hybrid of many merits, many forms being of exceptionally large size and fine shape.	5" 5½" 6"	10.00 12.50 15.00
28-7	<u>C. LABIATA (C. labiata, 'Ottawa' X C. labiata, 'Westonbirt')</u> Hybrid strain. To date we have heard of no finer C. labiata than this fine home raised strain bred from the two listed parents. For uniform quality, vigor, and all around dependability, this rivals most of our modern day hybrids. In addition to the qualities listed, selected forms have been used with outstanding results for breeding such hybrids as Lc. Trails End, C. Peetersii, C. Labi-Royal, and many others of comparable quality. This hybrid can easily be controlled for Christmas or through winter.	4" 4½" 5" 5½" 6" 7"	10.00 15.00 17.50 22.00 25.00 30.00
28-8	<u>C. THALA (C. labiata X Lc. Hertha)</u> Practically all hybrids derived from Lc. Hertha are outstanding for their fine shape, heavy substance, and rich coloring. We recommend this cross to those who desire hybrids of exhibition quality. Controllable.	4" 4½" 5"	15.00 17.50 20.00) 25.00)

No.	Parentage and Description	Pot Size	Price per Plant
28-9	<u>C. LABI-ROYAL (C. labiata X C.Mt. Royal)</u> This is a cross that has proven to be outstandingly vigorous and from which we have flowered many forms of large size, good shape, heavy texture, and rich coloring of real exhibition quality. Season is fall well through into early winter.	4" 4½" 5" 5½" 6"	\$10.00 15.00 17.50 20.00 25.00) 30.00)
28-10	<u>C. MEM. W. A. WAY (C. Eucharis X C.Edithiae, White Empress strain)</u> The Eucharis parent is 7/8 Mossiae Wageneri and is the parent which has influenced this cross to flower in March and April. We can honestly say we have never seen a more prolific white Cattleya. Plants are very vigorous. Flowers are borne on long, strong stems.	4" 4½" 5" 5½"	10.00 12.00 15.00 17.50
28-11	<u>C. MT. SHASTA (C. Estelle alba, a fine variety X C. Bebe White)</u> One of the loveliest of winter flowering whites. Large flowers of this variety are pure white, many of them having little if any coloring in the lip. The flowers on a great many forms resemble a fine C. Joyce Hannington. The season is winter and early spring. Specially selected varieties available also.	4" 4½" 5" 5½" 6"	15.00 17.50 20.00 25.00 30.00
28-13	<u>C. ROSE ANDRADE (C. Edithiae, 'White Empress' FCC.RHS X C. Bebe White)</u> We consider this cross to be an outstanding winter flowering white. Flowers are of good size and are borne in great profusion on sturdy plants. Prices on selected best varieties are also available on application.	4" 4½" 5" 5½" 6"	15.00 17.50 20.00 25.00 30.00
28-14	<u>C. WHITE SAIL (C. Olive Pearson X C. Bebe White)</u> Another hybrid bred from famous C. Bebe White. This cross is comparable in every way to C. Mt. Shasta and C. Rose Andrade. Flowering season is winter through early spring. Plants are very vigorous. Specially selected varieties available also.	4" 4½" 5" 5½" 6"	15.00 17.50 20.00 25.00 30.00

## CONDITIONS OF SALE

1. Orders will be filled in rotation. All items listed are subject to prior sale.
2. We reserve the right to limit quantities sold.
3. No substitutions will be made on any order either as to size or variety without authorization.
4. We do NOT make a packing charge on any order of \$10.00 or more. On orders of less than \$10.00 there is a \$1.00 charge.
5. Unless otherwise advised, shipment will be made via Railway Express, charges collect. (All orders are f.o.b., San Gabriel). However, we recommend Air Express (or Air Freight on large orders) for shipments destined for countries outside of the United States and for shipments to be made during the winter months when there might be danger of the plants freezing en route.
6. Claims for damaged shipments must be filed immediately with the carrier by the consignee. We make every effort to pack carefully, and our responsibility ends when the shipment is accepted by the carrier.
7. On the authority of your local Plant Quarantine Station, please advise us if there are any unusual requirements pertaining to the shipment of plants into your territory or country.
8. Our firm has been properly authorized to handle shipments to Hawaii. However, the customer must forward with his order his Permit Number which he must obtain from the Board of Commissioners of Agriculture and Forestry, Honolulu.
9. Unless your credit has been established with us, kindly enclose check, money order, or bank draft to cover payment of your order in full.
10. California purchasers add 3% state sales tax.
11. Prices subject to change without notice.
12. On certain orders, due to minimum freight charges, we ship parcel post and prepay. We appreciate prompt reimbursement of these charges.
13. Fred A. Stewart gives no warranty, express or implied, as to the productiveness of any of the plants we sell, and will not be any way responsible for the crop. Our liability in all instances is limited to the purchase price of these plants.
14. Plant Losses - Our reputation depends on the results you have and we make every effort to send you the finest possible stock. As they are living things, however, no one can guarantee that a given plant will thrive.
